Q. I note that parts of my previous public questions and references are not fully recorded in the unconfirmed minutes of the Ordinary Council meeting held on the 29th of June 2018.

A. The motion to rescind the previous resolution of Council required an absolute majority. This was not achieved so the motion lapsed. The declaration of interest is the responsibility of each elected member to declare whether they have a full interest or seek a ruling from Council in relation to the interest. Council originally resolved to continue the service for an interim period until it could determine what to do, there was no obligation to continue to employ the officer or the service.

B. Since Cr T Hodder did not declare an interest and voted on the motion to rescind the original decision, if Cr T Hodder had declared the same interest, what would have been the outcome of the absolute majority that was required for Item 12.1.1 of the March ordinary meeting 2018?

A. President Cr Joanne Kanny advised the above question will be taken on notice.
4.1.15 Neil Grinham question directed to President Cr Joanne Kanny

Q. I will re-ask this, Is the Council’s only employee the CEO?

**Matter for Consideration**

Council to give consideration to any submissions received from ratepayers and obtain ministerial approval for the imposing of a differential general rate that is more than twice the lowest differential general rate to be imposed.

**Background**

Council at its meeting held on 29 June 2018 adopted the following resolution:

1. **Advertise the intention to impose the following differential general rates and minimum payments applying to each of the differential rate categories in accordance with Section 6.36 of the Local Government Act 1995 be placed in the Geraldton Guardian newspaper and the Bulldust.**

2. **That the advertisement in (1) above also provide for an invitation for submissions to be made by an elector or a ratepayer for a period of 21 days closing at 4:00 pm on Friday 27 July 2018 and detail the time and place where the Shire of Yalgoo Rating Methodology and it’s Differential Rating Model may be inspected and a copy be placed on the Shire’s website.**

3. **That all rural/pastoral ratepayers be provided with a copy of the Shire of Yalgoo Rating Methodology and its Differential Rating Model and be invited to make submissions.**

4. **That Council adopts the Objects and Reasons for the following differential rating categories;**
   - **Town Improved-** consists of properties located within the townsite boundaries with a predominate residential, commercial and industrial use. This category is considered by council to be the base rate by which all other GRV properties are assessed and have a different demand and requirement on shire services and infrastructure.
- Townsite Vacant – Consists of vacant properties located within the townsite boundaries that are vacant (no residential commercial or industrial structures built on the land) The rate in the dollar is the same as the Town Improved category however the minimum rate is higher in order to encourage landowners to undertake development.

- Pastoral/Rural- this rating applies to all pastoral leases and land with a predominate rural land use. The proposed rate is comparatively lower when compared to the mining/mining tenement and exploration / prospecting categories on the basis that the pastoral industry has minimum impact or requirement on the shire services and infrastructure.

- Mining/ Mining Tenement- this category applies to all mining leases located within the shire. The proposed rate is comparatively higher when compared to the pastoral/rural category on the basis that mining operations require additional ongoing maintenance of the roads network that services this land use along with additional costs associated with the administration of mining tenements.

- Exploration / Prospecting – This rating category applies to exploration, prospecting and other general purpose leases located within the shire. The proposed rate is comparatively higher when compared to the pastoral/rural category and lower than the mining tenement category on the basis that the mining operations require additional and ongoing maintenance of the road network that services the land use, the additional cost associated with the administration of exploration and prospecting leases and the shire wishes to encourage exploration.

An advertisement was placed in the Geraldton Guardian on 6 July 2018, in accordance with the abovementioned resolution.

**Statutory Environment**

*Local Government Act 1995*

s6.33. Differential general rates

(3) In imposing a differential general rate a local government is not to, without the approval of the Minister, impose a differential general rate, which is more than twice the lowest differential general rate imposed by it.

**Financial Implications**

Council is required to raise different rates to meet its total expenditure commitments.

**Consultation**

**Comment**

A submission was received from McMahon Mining Title Services Pty Ltd on behalf of exploration and prospecting companies in Western Australia which states the following;
We act for a number of exploration and prospecting companies in WA and thank you for the opportunity to make a general submission regarding the proposed rates for 2018-19.

We note that valuations provided by the Valuer General are used to calculate rates for mining tenements each year, and that valuations are based on a multiple of the rent imposed by the Department of Mines, Industry Regulation and Safety.

In 2018-19, the Department will increase all tenement rents by six percent (except for exploration licences), with an additional six per cent increase in 2019-20 to fund the Exploration Incentive Scheme (EIS). For the first three years of an exploration licence, rents will increase by 1.5 per cent in 2018-19 and 2019-20 to protect the junior sector in finding the deposits of the future.

This rent increase will automatically result in an inflation in valuation and increase in rates even before any further increase in the rate in the dollar or minimum is applied by the Shire. The EIS is aimed at generating exploration activity and further increase in rates on top of the automatic increase, may result in double-dipping and diminish these intended effects.

The rent increases were published in the Gazette on 25 June 2018. A copy of the Department’s 2018-19 Fees and Charges is enclosed for reference.

We ask that the Shire consider this automatic increase in its rates modelling and give consideration to whether the rates for mining tenements can be reduced for the 2018-19 year.

In relation to Mining/Mining Tenement and Exploration / Prospecting differential rates no increase in the rate in the dollar has been proposed and will remain the same as 2015-16, a period of 3 years with no increase. The minimum rate will increase from $270 to $280 per annum for both categories.

The Shire proposes to levy the following rates for the differential rating categories “Exploration / Prospecting”, “Mining/Mining Tenement”

“UV Exploration/Prospecting” – 19.88253 cents in the dollar.

The rates levied for this category represents 6.6% of the total rates to be levied by the Shire. Of the 181 properties, 77 will be levied the minimum rate of $280 pa and 104 properties will be levied $1,128.32 pa on average. The rate in the dollar for this category differentiates it from mining tenements and acknowledges that less Shire resources are utilised by this category.

“UV Mining/Mining Tenement” – 37.43025 cents in the dollar.

The rates levied for this category represents 84.1% of the rates to be levied by the Shire. Of the 166 properties, 20 will be levied the minimum rate of $280 pa and 146 properties will be levied $10,650.62 pa on average. The rate in the dollar for this category is comparatively higher when compared to other categories on the basis additional Shire resources are utilised.

Both of the above mentioned categories rates in the dollar exceed the requirements set in Section 6.33(3) of the Local Government Act 1995, that is the rates in the dollar exceed by more than twice the lowest differential general rate of 6.77242 cents for “UV Pastoral/Rural” category. Therefore, approval is required from the Minister before Council can impose the above-mentioned rates in the dollar.

CEO Silvio Brenzi updated Council on the capital works programs.

Cr Gail Trenfield advised she had been approached by members of the public with some concerns as to the race track being dug up to lay pipes for drainage, as it is believed if the track is to be dug up horses are never allow to race on it again.

CEO Silvio Brenzi informed Cr Trenfield the same question was also mentioned and advised that there will be a pipe laid under the race track leading out to the centre and that horses will be allowed as there is already a pipe running under the track.

**Matter for Consideration**

The Shire has received an application for consideration in relation to a proposal to install a Telstra mobile phone base station located on Reserve 11867 within Ningham Station.

The application has been submitted by Planning Solutions on behalf of Service Stream Mobile Communications (SSMC) for its client, Telstra Corporation Limited (Telstra) with respect to the deployment of its mobile phone network.

A summary of the application is noted below:

A Telstra mobile phone base station facility, utilizing the existing 37.5 M guyed mast, which is proposed as part of the National Mobile Black Spot Program including:

- 4 x Omnidirectional antennas;
- 4 x Parabolic antennas;
- GPS antenna;
- 12 x Solar Panel arrays;
- 1 x Diesel Generator;
- Outdoor equipment shelter x 1;

The proposed facility will be contained within a 21.20 M x 20.30 M truncated security fenced compound. The mast is of a non-reflective galvanised finish which is considered the least obtrusive finish.

The facility will also reserve a 6.00 M space on the mast for future emergency services organisations infrastructure.

**Background**

The subject site is contained within the area covered by the Shire of Yalgoo Local Planning Scheme No. 2 (LPS2) and is a Local Scheme Reserve for Rural/Mining under the provisions of LPS2.

The proposal comprises of a the installation of four (4) omnidirectional antennas, one (1) GPS antenna and four (4) parabolic antennas on an existing 37.5 metre guyed mast, one (1) solar panel array and one (1) diesel generator at ground level, together with an outdoor equipment cabinet, cabling and ancillary equipment, including one (1) tower mounted amplifier and three (3) radio remote units.

The proposed infrastructure will be located on a reserve created to accommodate a trigonometrical station and also contains an existing 37.50 metre guyed mast utilised for radio transmission. The majority of the reserve will remain undisturbed, with the ground level infrastructure contained within the security fenced lease area containing the existing guyed mast, a solar panel array, diesel generator and equipment cabinets. Access to the site, once constructed, will be minimal, with an expectation of only one to two visits per year for maintenance. There is sufficient space within the lease area to accommodate a service vehicle.

**Consultation**

Chief Executive Officer – Mr. Silvio Brenzi
Environmental Health Officer/ Building Surveyor – Mr. Bill Atyeo
Strategic Implications
The strategic significance of telecommunications is identified in the State Planning Strategy which states:
“The development of State infrastructure, services and regional centres that employ new telecommunication technologies will enable business growth and efficiency. It will also enable people, resources and information to be linked in ways that reduce the barriers of location and time.”

Shire of Yalgoo Local Planning Strategy 2010
The Shire of Yalgoo Local Planning Strategy 2010 (Strategy) identifies the key issues relating to the Council’s long-term vision, values, aspirations and objectives for the Shire.

Sub clause 3.6.4 Telecommunications of Clause 3 Key Issues of the Strategy identifies that;
Land lines are provided by Telstra. There is no digital or cdma coverage.

Since the date of the Strategy mobile phone base stations have been installed throughout the Shire, however there are still substantial areas without effective coverage. Effective telecommunications is deemed an essential community service, vital to successful growth, development and safety. The proposed facility will provide terrestrial mobile voice and high-speed wireless data broadband to improve highway and town-to-town coverage to the rural communities, businesses, miners, tourists and travellers in the locality.

It is submitted the proposed development adequately addresses matters to be considered by Council and is considered to be consistent with the objectives of the Strategy.

Accordingly, the proposal warrants Council support and approval.

Policy Implications
The Shire of Yalgoo does not have a specific Telecommunications Local Planning Policy.

State Planning Policy No. 3.7–Planning in Bushfire Prone Areas
Department of Fire and Emergency Services mapping identifies the subject site is located within a Bush Fire Prone Area.

State Planning Policy No. 3.7 (SPP3.7) and Guidelines for Planning in Bushfire Prone Areas (Guidelines) provide objectives and guidelines on how bushfire risk is to be addressed when planning, designing or assessing a planning proposal within a bushfire prone area. Where required, SPP3.7 states that a Bushfire Attack Level (BAL) assessment is required as part of a planning application.

Whilst the subject site is located within a bushfire prone area, in accordance with Clause 5.8.4 of the Guidelines, a non-habitable building does not require a BAL assessment. Furthermore, Clause 5.7 of the Guidelines refers to telecommunications facilities as “unavoidable development,” where full compliance with SPP3.7 would be unreasonable.

A BAL assessment for the subject proposal is therefore not required.

State Planning Policy 5.2 – Telecommunications Infrastructure
The objectives of this policy are to:

- Facilitate the provision of telecommunications infrastructure in an efficient, cost-effective and environmentally responsible manner to meet community needs;
- Manage the environmental, cultural heritage, visual and social impacts of telecommunications infrastructure;
- Ensure that telecommunications infrastructure is included in relevant planning processes as essential infrastructure for business, personal and emergency reasons; and,
• Promote a consistent approach in the preparation, assessment and determination of planning decisions for telecommunications infrastructure.

It is considered that this proposal is consistent with these objectives.

The facility complies with State Planning Policy 5.2 Telecommunications Infrastructure in that it provides ‘essential infrastructure for business, personal and emergency reasons’ and addresses clause 5.1.1 of the policy which cites ‘The benefit of improved telecommunications services should be balanced with the visual impact on the surrounding area’. It is considered that community benefits derived from the proposed facility outweigh the consequential negative impacts.

Financial Implications
Should Council resolve to refuse or conditionally approve this proposal; an applicant aggrieved by a determination of the local government in respect of the exercise of a discretionary power under the Scheme may appeal under Part 14 of the Planning and Development Act. Such process would incur legal costs.

Legal and Statutory Implications
The Planning and Development Act 2005 and its Regulations provides for the creation of a Local Planning Scheme.

The Shire of Yalgoo Local Planning Scheme No. 2 (the Scheme) provides the mechanism for protecting and enhancing the environment of the district and its historical associations, controlling land and building development, setting aside land for future use as reserves and other matters authorised by the Planning and Development Act 2005.

Under the Scheme the proposed “telecommunications infrastructure” land use is not listed. Accordingly, under Clause 4.4.2 of the LPS2 - If a person proposes to carry out on land any use that is not specifically mentioned in the Zoning Table and cannot reasonably be determined as falling within the type, class or genus of activity of any other use category the local government may —

a) determine that the use is consistent with the objectives of the particular zone and is therefore permitted;
b) determine that the use may be consistent with the objectives of the particular zone and thereafter follow the advertising procedures of clause 9.4 in considering an application for planning approval; or
c) determine that the use is not consistent with the objectives of the particular zone and is therefore not permitted.

The land is identified as being a Local Reserve, which under Clause 3.4 of LPS2: a person must not —

a) use a Local Reserve; or
b) commence or carry out development on a Local Reserve, without first having obtained planning approval under Part 9 of the Scheme.

In determining an application for planning approval, the local government is to have due regard to —

a) the matters set out in clause 10.2; and
b) the ultimate purpose intended for the Reserve.

With respect to the above, it is considered that the proposed land use of ‘telecommunications infrastructure’ would not compromise the ultimate purpose intended for the reserve.

Heritage has also been considered and the attached report outlines the considerations and conclusions reached by Planning Solutions who act on behalf of Service Stream Mobile Communications (SSMC).
Nationally, telecommunications infrastructure is governed by the Telecommunications Act 1997. This is the overarching legislation. The main effect of this legislation is that there is a requirement for telecommunications infrastructure to comply with State (and local) planning and environmental approval procedures.

Should Council decide to refuse the application, it is likely that the matter will be sent to the State Administrative Tribunal (SAT) for review. Additionally, refusal of an application made under the National Black Spot Program has the potential to impact the future development and rollout of similar facilities required for the network operation throughout the area.

**Risk Implications**
As noted above, an applicant aggrieved by a determination of the local government in respect of the exercise of a discretionary power under the Scheme may appeal under Part 14 of the Planning and Development Act. Such process would incur legal costs.

**Social Implications**
The Shire of Yalgoo currently has many mobile black spots within its boundary. Poor reception in remote areas can be problematic for social connectivity and can also hamper the ability to communicate during emergency situations.

Effective telecommunications are deemed to be an essential community service, vital to successful growth, development and safety. The proposed facility will provide terrestrial mobile voice and high-speed wireless data broadband to improve highway and town-to-town coverage to the rural communities, tourists and travellers in the locality.

**Environmental Implications**
It is advised that the construction of the proposed guyed mast and associated ancillary development is unlikely to have a significant effect on the surrounding environment. Any possible impacts can be appropriately addressed through the existing planning framework.

While the proposal has the minimal impacts to the surrounding natural environment, it is recommended that during construction all care is taken to ensure that native wildlife is not interfered, erosion does not occur or is not likely to occur once the construction is complete and that any damage and rubbish created by the construction is appropriately remediated.

**Economic Implications**
There are no adverse economic implications envisaged from this report.

**Conclusion**
There is strong State policy support for telecommunications facilities if, when balancing improved telecommunications services with environmental impacts; including for example, visual impact and flood or fire hazard, a particular proposal provides a net community benefit.

The proposal presented is permissible under the provisions of the Shire of Yalgoo Local Planning Scheme No. 2 and is consistent with the objectives and provisions of the applicable statutory planning instruments and is consistent with the principles of orderly and proper planning as outlined in the full report.

In summary, the proposal is justified for the following reasons:

1. The proposed development is consistent with the Shire of Yalgoo Local Planning Strategy 2010
2. The proposed development is consistent with the Scheme provisions and objectives of the Shire of Yalgoo Local Planning Scheme No.2.
3. The proposal is consistent with the Western Australian Planning Commission’s State Planning Policy No. 5.2–Telecommunications Infrastructure.
4. The proposal is adequately separated from sensitive sites and residential development.
5. The infrastructure associated with the telecommunications facility will be contained within the existing site and will not involve the removal of significant vegetation.
6. Works associated with the development are not anticipated to detrimentally affect the amenity of the area.

The proposal is consistent with planning principles derived from state and local levels, and given the minimal impact on the amenity of the area and the locality, the application warrants approval from the Shire of Yalgoo.

The proposed telecommunications facility as part of the National Mobile Black Spot Program will provide improved coverage services within the Shire and will provide an overall benefit.

Under Clause 10.3 of the Shire of Yalgoo Local Planning Scheme No.2, in determining an application for planning approval the local government may –

a) Grant its approval with or without conditions; or
b) Refuse to grant its approval.

In this instance, it is considered that the application appropriately meets all statutory requirements and is therefore recommended that approval be granted subject to relevant conditions.

**Voting Requirements**
Simple Majority.

**Matter for Consideration**

That Council provide comments to the Department of Biodiversity, Conservation and Attractions in relation to the creation of a conservation park over the former Burnerinmah pastoral lease.

**Background**

The Burnerinmah pastoral lease was purchased by the Department of Conservation and Land Management in 1995. The pastoral lease was surrendered and the land reverted to crown land.

**Statutory Environment**

**Land Administration Act 1997**

s14 *Minister to consult local governments before exercising certain powers in relation to Crown land*

Before exercising in relation to Crown land any power conferred by this Act, the Minister must, unless it is impracticable to do so, consult the local government within the district of which the Crown land is situated concerning that exercise.

**Financial Implications**

Concerns over the erosion of the Shire rating base while continuing to service the area.

**Consultation**

Nil

**Comment**

The proposed conservation park has an approximate area of 50,508 hectares and it will be established for conservation and recreational purposes as part of the Karara Rangelands Park. The department states that the installation of recreation and tourism facilities such as day use areas and basic camping facilities could be established as funding permits and enter into partnership with Aboriginal people to manage and interpret the Culture values of the land.

Whilst the Shire sees the benefits in the creation of a conservation park it never the less has concerns that a number of pastoral leases have been acquired by the department which in turn erodes the Shire’s limited rate base whilst having to continue to provide services to the area, thus adversely impacting on the Shire’s finances.

A contribution by the Department in lieu of rates for these conservation areas could alleviate this concern.
